

## CONTENTS VOL. 20, 1986

Editorial . . . . .	1
Application of particle induced X-ray emission to aerosol long-range transport studies — transport pathways of pollution aerosol over the Atlantic Ocean and Europe P. Metternich, H.-W. Georgii and K.O. Groeneveld (Frankfurt am Main, F.R. Germany) . . . . .	3
Oxygen isotopic composition of Central Sierra Nevada precipitation, I. Identification of ice-phase water capture regions in winter storms J.A. Warburton and T.P. DeFelice (Reno, Nev., U.S.A.) . . . . .	11
Temporal and spatial variations of marine aerosols over the Atlantic Ocean F.P. Parungo, C.T. Nagamoto and J.M. Harris (Boulder, Colo., U.S.A.) . . . . .	23
Evaluation of a new aerosol model with a Brownian diffusion technique G.E. Shaw (Fairbanks, Alaska, U.S.A.) . . . . .	39
Studying the spatial and temporal distribution of SO <sub>2</sub> in an urban area by principal component factor analysis M.L. Sanchez, J.L. Casanova, M.C. Ramos (Valladolid, Spain) and J.L. Sanchez (Leon, Spain) . . . . .	53
Determination of total vertical water vapor in the atmosphere V.E. Cachorro, A.M. de Frutos and J.L. Casanova (Valladolid, Spain) . . . . .	67
Technique for studying the chemistry of cloud condensation nuclei E.K. Bigg (Sydney, N.S.W., Australia) . . . . .	75
Discrepancy between observation and prediction of concentrations of cloud condensation nuclei E.K. Bigg (Sydney, N.S.W., Australia) . . . . .	81
Convection and cloud formation over snow-covered surface S.K. Chai (Reno, Nev., U.S.A.) . . . . .	87
<i>Book Review</i>	
Comptes-rendus des secondes journées d'études sur les aérosols, publ. by Gams, Paris — A. Renoux . . . . .	101
Announcement . . . . .	103
Editorial . . . . .	105
Éditorial . . . . .	107
Implementation of a multiaxial Doppler sodar system with advanced data processing G. Elisei, M. Maini, A. Marzorati, M.G. Morselli (Milan, Italy), G. Fiocco, S. Cantarano (Rome, Italy) and G. Mastrantonio (Frascati, Italy) . . . . .	109
Estimating surface sensible heat flux using sodar and surface temperature measurements in the evolving convective boundary layer K. Sen Gupta, P.R. Kunhikrishnan, V. Radhika and K. Narayanan Nair (Trivandrum, India) . . . . .	119
Studies of sodar surface-based shear echo structures S.P. Singal, B.S. Gera, D.R. Pahwa and S.K. Aggarwal (New Delhi, India) . . . . .	125
Correlation of studies of surface-level carbon monoxide concentrations and sodar-observed thermal structures S.P. Singal, S.K. Aggarwal, B.S. Gera, D.R. Pahwa and M. Sharma (New Delhi, India) . . . . .	133
Effect of refraction of sound on bistatic Doppler sodar measurements of wind profiles T. Mathews, D.A. Bohlender and D. Smith (Calgary, Alta., Canada) . . . . .	141

Mean turbulent properties of the stable boundary layer observed during the "Coast" experiment	
G. Desbraux and A. Weill (Issy-les-Moulineaux, France) . . . . .	151
Stability classification by acoustic remote sensing	
P. Thomas (Karlsruhe, F.R. Germany). . . . .	165
Convective dispersion modelling utilising acoustic sounder information	
P.R. Best, M. Kanowski, L. Stümer and D. Green (Brisbane, Qld., Australia). . . . .	173
Sodar retrieval of vertical acceleration, and implications for the determination of temperature and fluxes in the convective boundary layer	
G. Fiocco, M.G. Ciminelli (Rome, Italy) and G. Mastrantonio (Frascati, Italy) . . . . .	199
Simultaneous operation of a sodar system in monostatic and bistatic modes: preliminary results	
G. Mastrantonio (Frascati, Italy), G. Fiocco (Rome, Italy) and A. Marzorati (Milan, Italy) . . . . .	213
Investigations of the convective planetary boundary layer using a multiple frequency sodar	
R.L. Coulter and T.J. Martin (Argonne, Ill., U.S.A.). . . . .	225
Radio wave propagation and acoustic sounding	
S.P. Singal (New Delhi, India) . . . . .	235
Results from a high-power, high-frequency sodar	
R.L. Coulter and T.J. Martin (Argonne, Ill., U.S.A.). . . . .	257
A phase-sensitive acoustic sounder for the detection of atmospheric temperature	
R.B. Hicks and P.J. Irwin (Calgary, Alta., Canada). . . . .	271
On the use of sodars to study stratified flow influenced by terrain	
W.D. Neff (Boulder, Colo., U.S.A.) . . . . .	279
Results on planetary boundary layer sounding by automatic RASS	
G. Bonino (Torino, Italy), G. Elisei, A. Marzorati (Milan, Italy) and P. Trivero (Torino, Italy) . . . . .	309
The CRPE minosodar: applications in micrometeorology and in physics of precipitations	
A. Weill, C. Klapisz and F. Baudin (Issy-les-Moulineaux, France) . . . . .	317
